## ZOOLOGY AT THE NEW YORK MEETING

### I

At the convocation week meetings held in New York, December 27, 1906, to January 2, 1907, Section F of the American Association for the Advancement of Science and the Eastern Branch of the American Society of Zoologists held joint meetings throughout for the reading of papers. In the forenoon of Friday, December 28, there was a joint session of these two societies with Section G, devoted to papers on animal and plant breeding, and in the afternoon of the same day the societies joined with the American Society of Naturalists in a discussion on the biological significance and control of sex, which has been published in full in SCIENCE for March 8. Section F and the Society of Zoologists held separate business sessions, the proceedings of which follow.

### SECTION F

A business meeting was held December 27 for the election of officers, and the section was represented in a committee of the council which recommended the appointment by the president of the association of a committee to arrange a suitable memorial of the fiftieth anniversary of the publication of the 'Origin of Species.' The officers for the ensuing year are as follows:
